THE INCREDIBLE HULK

JOHNNY WONDER

A. A sea horse is a strangely shaped fish with a long, tube-like snout. Sea horses get their name because their heads and necks look very much like those of tiny horses. A very curious thing about sea horses is the way they care for their eggs. On the male's body is a pocket called a "brood pouch." When raising their young, the female sea horse places her eggs in the male's brood pouch. The male carries the eggs until they hatch into living sea horses, each a tiny replica of the adult. You can see why people might get the mistaken idea that male sea horses have babies.

You can win a World Almanac if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1283, (DA) Santa Cruz, CA 95061.
